EDUCATION

Colorado School of Mines

B.S. Computer Science — Specialty in Data Science

Exp. May 2027

M.S. Data Science — Combined B.S./M.S. Program (In Progress, Fall 2026)

Exp. December 2027

Relevant Coursework: AI, Advanced Data Science, Software Engineering, Databases (*In Progress: Machine Learning, Advanced Statistical Modeling, Coding with AI*)

EXPERIENCE

Project Management Office (Colorado School Of Mines)

December 2025 - Present

- Configured backend settings in TeamDynamix (TDX) by updating system parameters, resulting in broader process improvements across the PMO workflow
- Documented and presented system change requirements using the project management intake process, ensuring changes were reviewed and approved by project leads
- Mapped external intranet pages to a new internal system by coordinating with multiple outside teams, enabling a smooth platform transition
- Supported BA work across multiple concurrent projects by gathering requirements and producing documentation as directed by project managers

IT Service Desk (Colorado School Of Mines) - Student Manager, Documentation Lead

October 2024 - Present

- Developed and ran custom reports in TeamDynamix (TDX) to provide key analytical insights into team productivity, resource utilization, and ticket trends, shared across multiple levels of leadership
- Contributed to the modernization of the IT Service Desk Knowledge Base within TDX, standardizing content, structure, and tagging to enhance search efficacy
- Collaborated with team members to maintain accurate and up-to-date documentation, fostering efficient communication and workflow within the department
- Provided advanced customer support and collaborated with various IT teams on complex issue resolution across a wide range of university technology platforms

ESG Software Developer Intern (Janus Henderson Investors)

June - Aug 2024

- Built an interactive Power BI dashboard to monitor platform user engagement (demographics, traffic, feature adoption) and support data-driven decisions for new feature releases
- Gained hands-on experience with Kusto, Snowflake, SQL, and Azure Logs, applying them to real-world platform monitoring and data analytics pipelines
- Collaborated with technical and business teams to design a new platform page mockup, translating requirements into an interactive model integrated with live Power BI data

IT Service Desk Technician (Janus Henderson Investors)

July 2022 - July 2023

Apprentice- CareerWise Colorado in Conjunction with Denver Public Schools (careerwisecolorado.org)

- Contributed to the internal knowledge base, creating and updating support documentation to improve technician efficiency and enable faster first-call resolution
- Designed and delivered training sessions for new hires and various internal applications, enhancing IT team capabilities and end-user proficiency
- Delivered exceptional white-glove customer service, responding to software and hardware inquiries from end users including executives and portfolio managers

PROJECTS

- **Predictive Housing Investment Model:** Developed and validated a predictive machine learning model for housing investment strategy, using Artificial Neural Networks, Random Forest, and Linear Regression on integrated climate, housing, and demographic datasets to forecast market trends and recommend optimal investment locations.
- **City of Idaho Springs Economic Impacts Dashboard:** Partnered with the City of Idaho Springs and a team of 5 to build a multi-source economic impact dashboard in Power BI; served as Scrum Master, contributed to data ingestion and modeling, and authored technical reports consumed by city departments and external stakeholders
- **Clue Digital Simulation (Java):** Engineered a functional digital simulation of the classic game Clue in Java, utilizing JIRA for agile project management to track sprints, manage feature backlog, and resolve development issues within a structured, iterative workflow.

SKILLS:

- **AI & Data Science:** R, Machine Learning, Neural Networks (ANN), Scikit-learn, Statistical Modeling, Predictive Modeling, Data Analysis
- **Data & Analytics:** SQL, PostgreSQL, Snowflake, Azure Logs, Kusto, Power BI, Data Visualization
- **Programming:** Python, C++, C#, Java, Git
- **ITSM & PM:** TeamDynamix (TDX), ServiceNow, JIRA, Agile/Scrum, Technical Documentation
