## EDUCATION

---

### Colorado School of Mines

GPA: 3.91

B.S. Computer Science — Data Science

May 2027

M.S. Data Science

December 2027

Business Analytics Certification

December 2027

Relevant Coursework: Artificial Intelligence, Advanced Data Science, Software Engineering, Database Management, Machine Learning, Advanced Statistical Modeling, Coding with AI

## EXPERIENCE

---

### Project Management Office — Colorado School of Mines

December 2025 – Present

- Mapped and verified over 500 pages of content from an external intranet to a new internal system, coordinating with multiple stakeholder teams to confirm accuracy, then trained staff to continue the mapping and documentation process
- Identified process pain points and instances of ineffective reporting through PMO reviews; documented findings and partnered with PMO leadership to implement and verify corrected processes

### IT Service Desk — Student Manager — Colorado School of Mines

October 2024 – Present

- Developed and ran custom reports in TeamDynamix (TDX) to analyze team productivity, resource utilization, and ticket trends, sharing insights across multiple levels of leadership
- Led modernization of the IT Knowledge Base in TDX, standardizing content and structure to improve efficiency

### ESG Software Developer Intern — Janus Henderson Investors

June 2024 – August 2024

- Built an interactive Power BI dashboard to track platform user engagement (demographics, traffic, feature adoption), supporting data-driven decisions for new feature releases
- Applied Kusto, Snowflake, SQL, and Azure Logs to real-world platform monitoring and data analytics pipelines
- Partnered with technical and business teams to design a new platform page mockup, translating requirements into an interactive model integrated with live Power BI data

### IT Service Desk Technician — Janus Henderson Investors

July 2022 – July 2023

- Contributed to the internal knowledge base, creating and updating support documentation to improve technician efficiency and first-call resolution
- Designed and delivered training sessions for new hires on internal applications, improving team capabilities and end-user proficiency

## PROJECTS

---

### Predictive Housing Investment Model

Spring 2025

- Developed and validated a machine learning model for housing investment strategy using Artificial Neural Networks, Random Forest, and Linear Regression on integrated climate, housing, and demographic datasets
- Forecasted market trends and identified optimal investment locations based on model outputs

### City of Idaho Springs Economic Impacts Dashboard

Summer 2026

- Served as Scrum Master for a 5-person team on the City of Idaho Springs economic impact dashboard project
- Led data ingestion for the project and built a multi-source Power BI dashboard integrating foot-traffic, sales tax, and lodging data to quantify the economic impact of the city's recreation investments
- Authored technical documentation and reports on the dashboard's data sources and methodology, used by city leadership, business owners, and grant writers to guide funding decisions

## SKILLS

---

**AI & Data Science:** R, Machine Learning, Neural Networks (ANN), Scikit-learn, Statistical Modeling, Predictive Modeling, Data Analysis

**Data & Analytics:** SQL, PostgreSQL, Snowflake, Azure Logs, Kusto, Power BI, Data Visualization

**Programming:** Python, C++, C#, Java, Git, OCaml, Assembly

**ITSM & Project Management:** TeamDynamix (TDX), ServiceNow, JIRA, Agile/Scrum, Technical Documentation, WordPress
